Tables engineered for high risk environments.

Every surface in a secure environment carries risk and tables are built to the same standard as every other Armadillo® piece. Hard edges, metal frames, and bolted-down furniture create hazards that conventional products cannot resolve. The Armadillo® Table Collection significantly reduces all of these. Built from solid foam with no metal or wooden components, finished in Abecca's proprietary LimberShield® surface, each table is fully waterproof, anti-bacterial, and fire-resistant. Substantial enough to resist casual mishandling; designed to minimise harm if thrown or struck. Standalone, no bolting down required, and no risk of being used as an anchor point. Handcrafted in our New Zealand and Australian facilities.

LimberShield®

Abecca's proprietary surface finish, waterproof, anti-bacterial, fire resistant, and engineered to withstand the demands of the most challenging environments. Applied to every piece. Triple-layer protection with 450–550% elongation range. Not just a finish. A commitment.

Testing & Compliance
No bolting down required

AR84 LimberShield®

Length	2000mm
Width	1000mm
Height	780mm
Weight	47kg
Seating	6–8 approx
Warranty	7 year structural

In practice

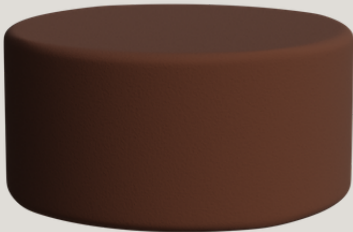

"The safest table in the world. No exceptions."

Every dining table in the Armadillo® Collection is built from solid foam the same material and construction as Abecca's seating range. No metal frame. No wooden substructure. No hard edges. Standalone, so it requires no bolting down and cannot become an anchor or suspension point. The result is a dining-height table that significantly reduces risk without compromising the appearance and function of a normal dining environment.

02 Coffee Table Collection
