WHAT OUR CUSTOMERS SAY 141

CARE INSTRUCTIONS 142

CONTACT 143

ARE YOU SURE YOUR FURNITURE IS SAFE?

In high-risk environments like mental health facilities and correctional institutions, furniture safety is crucial. Our latest ***Armadillo®*** furniture is specifically designed with these settings in mind, prioritising both durability and security. Engineered to withstand challenging conditions, our pieces feature soft, impact-absorbing surfaces and rounded edges to minimise the risk of injury.

Our latest seamless design eliminates gaps, joints and weak points, making it easier to clean and maintain, while preventing any potential harm. We use materials that prevent misuse while ensuring comfort and stability. Our products meet rigorous safety standards, giving you peace of mind that your furniture isn't just functional but safe for everyone in your facility.

ABECCA VALUES

A strong, reliable organisation built upon:

INNOVATION

We challenge the status quo every time

LOYALTY

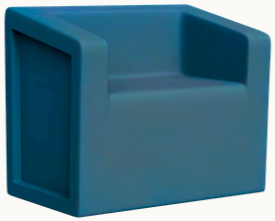

We trust and support each other in achieving our goals

PASSION

We believe in our products and will not sacrifice on quality

CARE

We genuinely care for our customers, suppliers and staff alike

INTEGRITY

We stand by our word and every commitment

OUR STORY:

Abecca’s experience with textiles first started in 1952, when Mr David Beatson returned from World War II and started a new life supplying and repairing cow covers using canvas fabric.

Fast forward 70+ years and the same Beatson family has built a reputation as specialists in furniture for the world's most demanding, high-risk environments. With the 4th generation actively involved, we are family owned through and through..

Designers, Innovators and Manufacturers of furniture engineered for high-risk environments best describes Abecca in a few words. Because we’re client-first and we manufacture in-house, every detail on every piece reflects direct feedback from clients like you. Being the manufacturer gives us and you such an advantage where even a minor change to a product is absolutely no issue to Abecca.

Hamish Beatson **Joseph Beatson**

FOUNDERS

TIMELINE

1952

David Beatson (the Abecca founders great grandfather) started working with textile fabrics.

2013

Abecca Healthcare registered as a standalone entity.

2015

Abecca’s first Sensory furniture item produced (the sensory rocking chair).

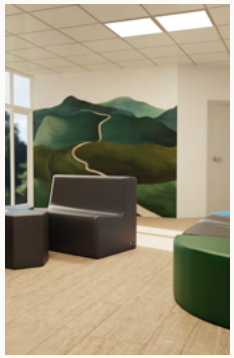

2018

Strong growth in the mental health furniture space resulted in Abecca rebranding and trading as Abecca by Design.

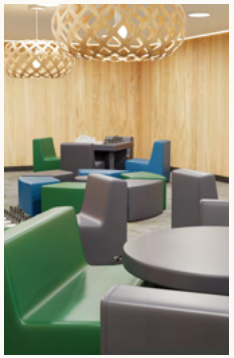

2019

Abecca’s Eagle Range was born.

2020

Abecca working closely with youth justice space to produce 100% fit for purpose furniture.

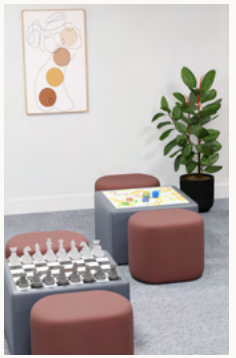

2023

Abecca’s Hawk range officially launched.

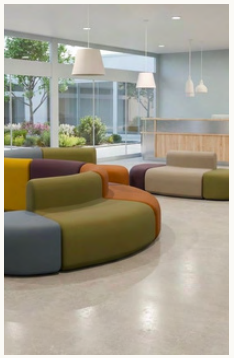

2024

Hawk and Eagle range is completely refreshed with new designs and greatly improved durability.

2025

Launch of the Armadillo range with LimberShield® proprietary finish, setting a new standard in safety and design.

2026

Design innovation continues with the introduction of Modular, Bariatric and new technical seating ranges.

ABOUT OUR RANGE:

The Armadillo® Range is a revolutionary, seamless furniture collection designed for the most demanding environments. Engineered to provide a perfect balance of safety, durability, and comfort, it features our exclusive, LimberShield® proprietary finish, offering enhanced protection against wear, misuse, and easy maintenance. Despite its robust construction, the Armadillo® Range remains soft, comfortable, and inviting, making it ideal for high-risk settings where comfort is key.

Built to be fire retardant and waterproof, the Armadillo® Range ensures peace of mind in any environment. It's incredibly strong and hygienic, designed to withstand frequent use while minimising the risk of infection or contamination. The range is fully customisable to suit your specific needs, all while maintaining a modern, homely aesthetic that moves away from the institutional look.

Fit for purpose and engineered with the end user in mind, the Armadillo® Range is the perfect solution for mental health, correctional, and other high-risk settings where safety, durability, and comfort are paramount.

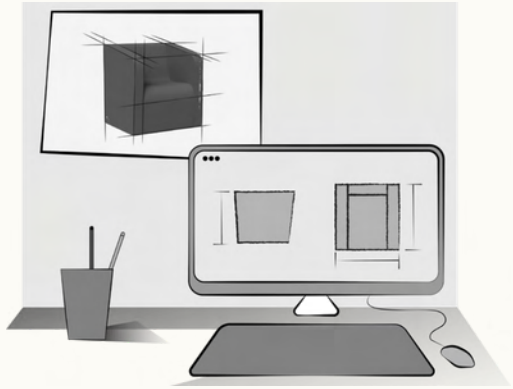

SO WHY CALL IT THE Armadillo® RANGE?

We chose the name "Armadillo®" to reflect the unique qualities that define this range. Just like the armadillo, our furniture combines a strong, protective outer layer with a soft, caring inner core. The tough, durable exterior represents the strength and resilience of the Armadillo® Range, while the comfortable, inviting interior mirrors the care and comfort we've built into every piece.

Not only is the Armadillo® Range highly functional and protective, but its sleek, modern design ensures it looks as good as it performs. The result is a beautiful, secure solution perfect for high-risk environments where both appearance and performance matter.

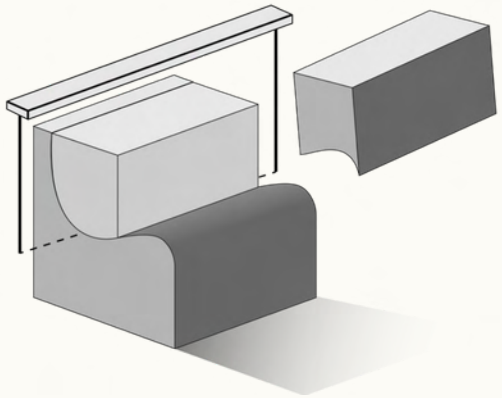

OUR COMPLETE PROCESS

01.
CONCEPT & CAD DESIGN

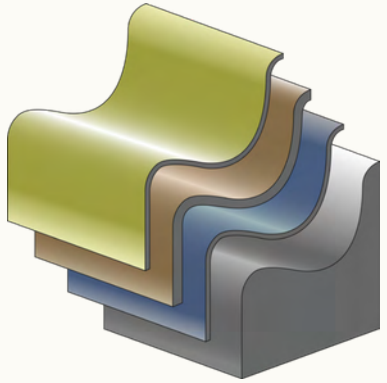

We begin by crafting detailed CAD designs, ensuring each piece is precisely tailored to fit your requirements, whether standard or custom.

02.
CNC FOAM CUTTING & FABRICATION

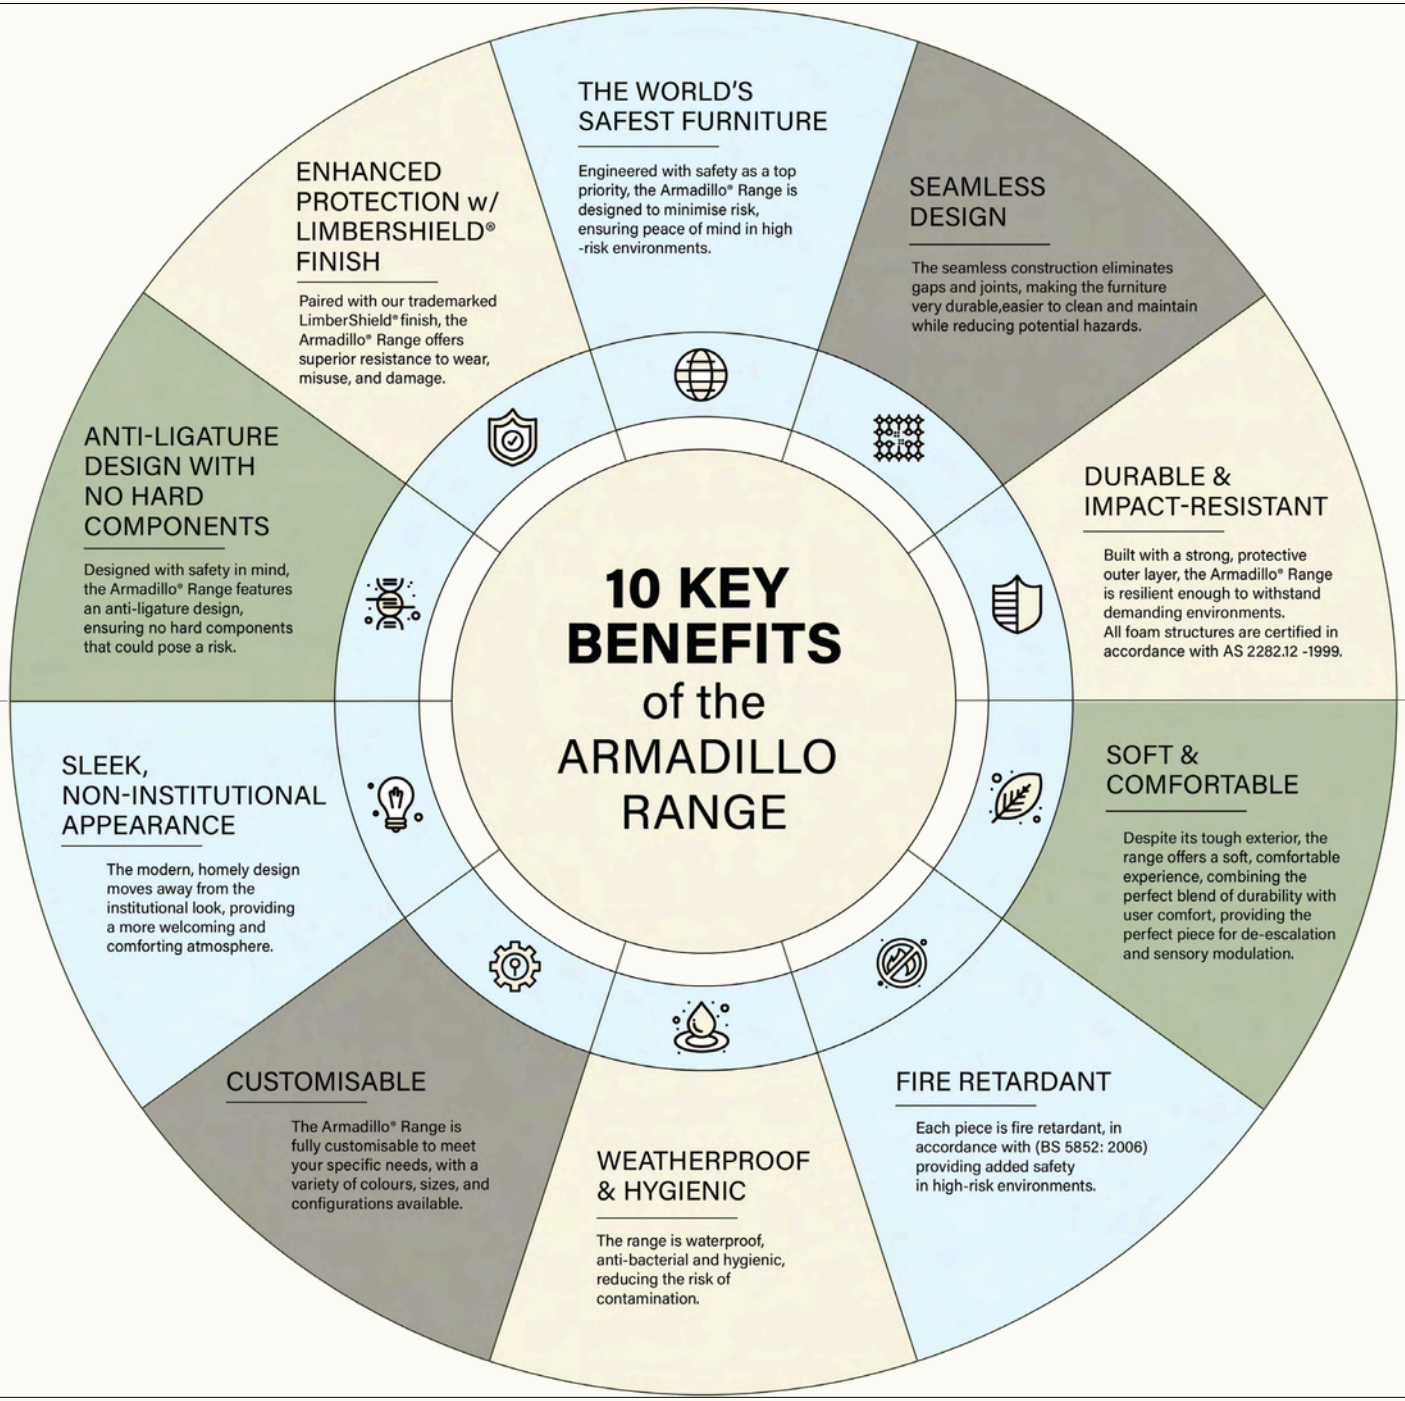

Using advanced CNC and robotic machinery, we cut and fabricate foam in varying densities to provide optimal comfort, support and safety.

03.
FINISHED WITH OUR LIMBERSHIELD® TECHNOLOGY

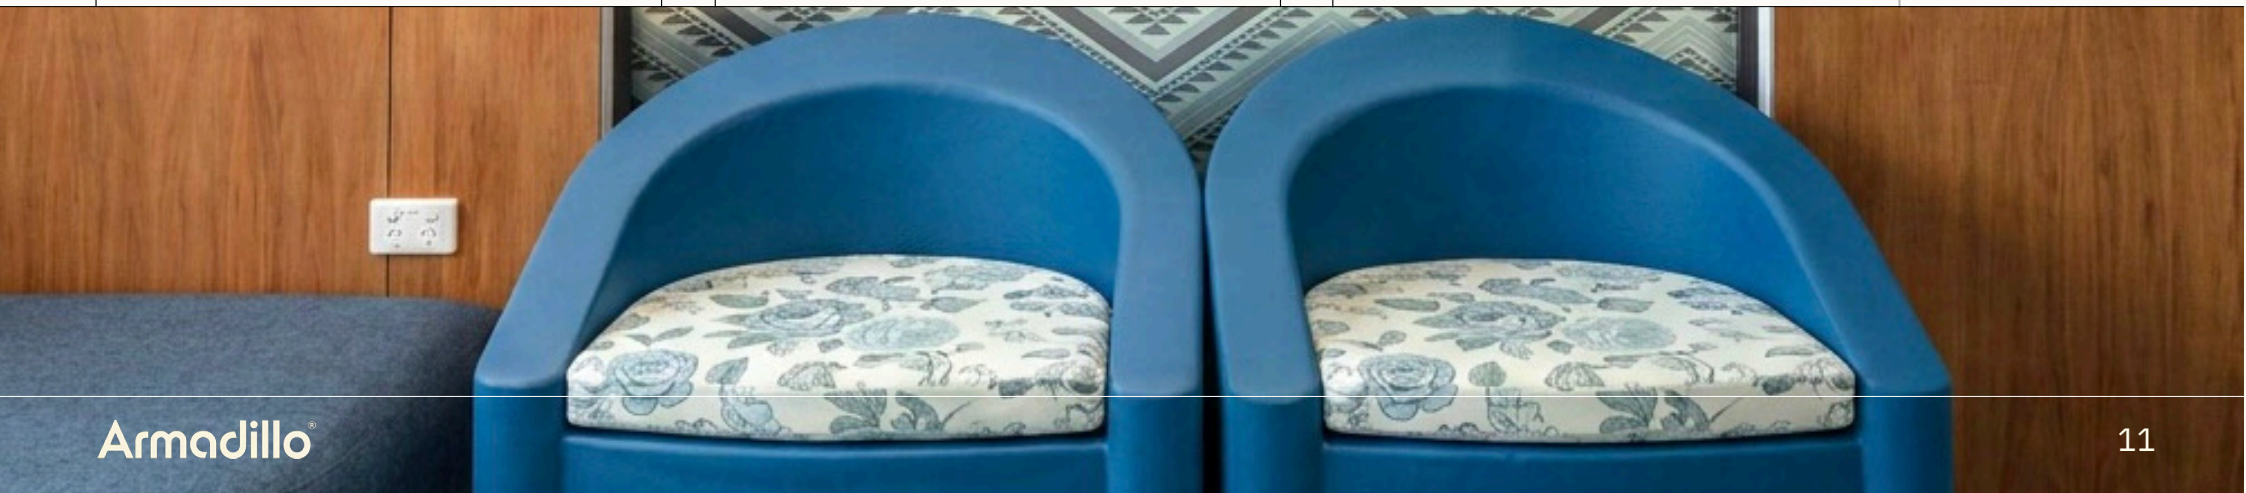

Finally, each piece is finished with our LimberShield® technology, enhancing durability and providing long-lasting protection.

And because of our state-of-the-art machinery, we can do it all with very short lead times and minimal cost.

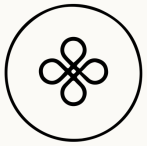

10 KEY BENEFITS of the ARMADILLO RANGE
THE WORLD'S SAFEST FURNITURE
Engineered with safety as a top priority, the Armadillo® Range is designed to minimise risk, ensuring peace of mind in high -risk environments.
SEAMLESS DESIGN
The seamless construction eliminates gaps and joints, making the furniture very durable,easier to clean and maintain while reducing potential hazards.
DURABLE & IMPACT-RESISTANT
Built with a strong, protective outer layer, the Armadillo® Range is resilient enough to withstand demanding environments.
All foam structures are certified in accordance with AS 2282.12 -1999.
SOFT & COMFORTABLE
Despite its tough exterior, the range offers a soft, comfortable experience, combining the perfect blend of durability with user comfort, providing the perfect piece for de-escalation and sensory modulation.
FIRE RETARDANT
Each piece is fire retardant, in accordance with (BS 5852: 2006) providing added safety in high-risk environments.
WEATHERPROOF & HYGIENIC
The range is waterproof, anti-bacterial and hygienic, reducing the risk of contamination.
CUSTOMISABLE
The Armadillo® Range is fully customisable to meet your specific needs, with a variety of colours, sizes, and configurations available.
SLEEK, NON-INSTITUTIONAL APPEARANCE
The modern, homely design moves away from the institutional look, providing a more welcoming and comforting atmosphere.
ANTI-LIGATURE DESIGN WITH NO HARD COMPONENTS
Designed with safety in mind, the Armadillo® Range features an anti-ligature design, ensuring no hard components that could pose a risk.
ENHANCED PROTECTION w/ LIMBERSHIELD® FINISH
Paired with our trademarked LimberShield® finish, the Armadillo® Range offers superior resistance to wear, misuse, and damage.

WHY YOU'LL LOVE OUR FURNITURE

NO HARD OBJECTS	FIRE RETARDANT FURNITURE	ANTI-BACTERIAL & ANTI-FUNGAL
High-durability foam construction replaces hard materials without compromising integrity.	Commercial-grade furniture meets BS 5852:2006 safety standards.	Treated foam and Limbershield® to prevent bacteria and fungal build-up.
ONE-PIECE DESIGN	**ERGONOMIC & STURDY**	**SENSORY MODULATION**
Seamless finish to prevent bacteria accumulation.	Designed for stability and support, with a safe working load of up to 200kg.	Some items help with de-escalation and sensory regulation.

FURNITURE SYMBOLS

SEAMLESS DESIGN
No gaps or joints for easy cleaning and durability.

LIMBERSHIELD® FINISH
Armadillo's proprietary thermo-fusion finish: seam-free and built to last.

ANTI-LIGATURE & DURABLE
Fully seam-free surface engineered to eliminate ligature points.

HYGIENIC & WATERPROOF
Wipe-clean, waterproof surface with antibacterial performance.

FIRE RETARDANT
Certified fire performance for demanding environments.

CUSTOMISABLE DESIGN
Available in a range of sizes to suit your space.

RECYCLABLE
Recyclable materials, ensuring sustainability and security in every piece.

BARIATRIC & OVERSIZED
Reinforced construction built for higher weight capacities.

COMFORT
Designed for extended-use comfort in therapeutic and care environments.

REPOSITION WITH EASE
Designed for confident repositioning without compromising stability.

STRENGTH TESTED
Tested for resilience, built to endure the rigours of constant, severe use.

NO ASSEMBLY REQUIRED
Freestanding by design: no fixings or installation required.

PAIRS WITH
Designed to complement other pieces across the range.

ROCKING
A gentle rocking motion designed to support calm and self-regulation.

SLEEP & REST
Supportive form designed for extended rest and sleep.

MULTI SEAT
Configurable seating designed to encourage social interaction.

WARRANTIES & SERVICE

7-YEAR WARRANTY

Our Armadillo® Range is engineered for strength and longevity. With a 7-year structural warranty, you can trust it to deliver lasting performance.

Giving you peace of mind that your investment is completely protected.

Accidents happen, if it’s a product fault, we’ll repair or replace it, no questions asked. For misuse, we’ll restore your furniture to like new condition at minimal cost.

DESIGNED & MADE IN OUR FACTORY

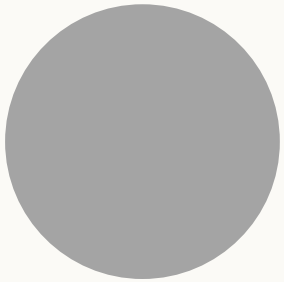

As the manufacturers of our own anti-ligature furniture, we control every step of the process, from design to production.

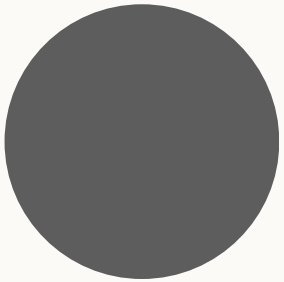

This ensures top-quality craftsmanship, complete customisation, and the ability to quickly address any needs or changes without delays.

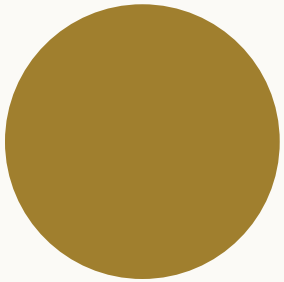

When you choose Abecca, you’re choosing direct access to the designers & makers of your furniture, giving you peace of mind and the assurance of superior quality.

CUSTOM-MADE SOLUTIONS & 3D RENDERING SERVICES

We specialise in bespoke, high-risk anti-ligature furniture, ensuring safety without compromising design. Our expert team provides custom-made solutions tailored to your specific needs, backed by advanced 3D room rendering services. This allows you to visualise spaces before production, ensuring precision and functionality. With a strong focus on security, durability, and aesthetics, our furniture meets the highest safety standards.

PARTNER WITH US FOR INNOVATIVE, CUSTOM BUILT ANTI-LIGATURE SOLUTIONS DESIGNED TO CREATE SECURE, COMFORTABLE, AND WELL-PLANNED ENVIRONMENTS.

1. Submit Your Idea
Share your vision with us, our team listens carefully to understand your needs and requirements.

2. Concept, Rendering, & Prototyping
We work on your concept, creating 3D room renderings and prototypes to refine the design.

3. Final Sign-Off & Production
Once you're happy with the design, we finalise it for production, ensuring everything meets your specifications.

Abecca’s LimberShield® Proprietary Finish

LimberShield® an Advanced finish for High-Risk Environments

Abecca's LimberShield® proprietary finish is a finish developed for our anti-ligature foam furniture, engineered to deliver maximum safety, durability, and performance in demanding settings.

The name says it all, “Limber” for flexibility, essential to user safety, and “Shield” for the tough, protective layer that resists impact, tearing, and wear. Applied in-house, LimberShield® ensures long-term performance while withstanding rigorous cleaning and daily use ideal for behavioural health, custodial, and other high-security environments.

Benefits

Enhanced Safety
Developed specifically for anti-ligature use, the finish helps prevent tampering, self-harm, and misuse, ideal for high-risk, secure environments.

Triple Layer, Highly Flexible Protection
With an elongation range of 450-550%, LimberShield® maintains its integrity under pressure, offering exceptional flexibility without sacrificing strength, ideal for environments where resiliance and softness are both essential.

Waterproof & Easy to Clean
Fully sealed and non porous, LimberShield® is 100% waterproof, allowing for quick, effective cleaning to meet hygiene and infection control protocols.

Fire-Retardant
Complies with BS5852: 2006 and BS7177 Crib 7 safety standards, providing critical protection in environments where fire resistance is essential.

In-House Application for Total Quality Control
Every layer is applied by Abecca during manufacturing, ensuring consistent finish, high performance and complete quality assurance.

Trusted in
Mental Health units, Custodial settings, Rehab Facilities, and other secure, hig-risk environments.

LimberShield®
ONE FINISH
EVERY DEMAND IT HAS TO MEET

LimberShield® is Abecca's proprietary thermo-fusion finish, engineered into the surface of every Armadillo® piece. It is not a coating applied afterwards, it is part of the build.

Seam-free protection

Removes stitiching, piping, and joins where ligature points and concealment can occur.

Waterproof barrier

Resists liquid ingress across the full surface, supporting fast, thorough cleaning between uses.

Antibacterial performance

Surface tested for antibacterial activity, supporting infection control across clinical and care settings.

Fire resistance

Certified to BS 5852 : 2006 and BS 7177 : 2008 across the Armadillo® range.

The same finish, the same standards, whether the piece is a single chair, a modular form, or built for bariatric use.

The right furniture reduces incidents.

Every Armadillo® form shares the same solid foam construction and LimberShield® finish. What changes is the shape, scaled to the person, the room, and the way the space is used.

Seating Collection

Armchairs, rocking chairs and couches built for individual rooms, bedrooms, and one-to-one observation spaces. The foundation of the Armadillo® range suited to mental health, corrections, youth justice and aged care.

Modular Collection (ARM1–ARM10)

Low, reconfigurable soft seating designed to be regrouped as a session, activity or layout changes. Six colours in a therapeutic palette. Designed for therapeutic and communal settings, not for aged care.

Bariatric Range (ARB1, ARB30/31, ARB60, ARB70/72)

Generously proportioned design built for higher-capacity comfort, carrying the same construction and finish standards as the rest of the range.

Armadillo Comfort

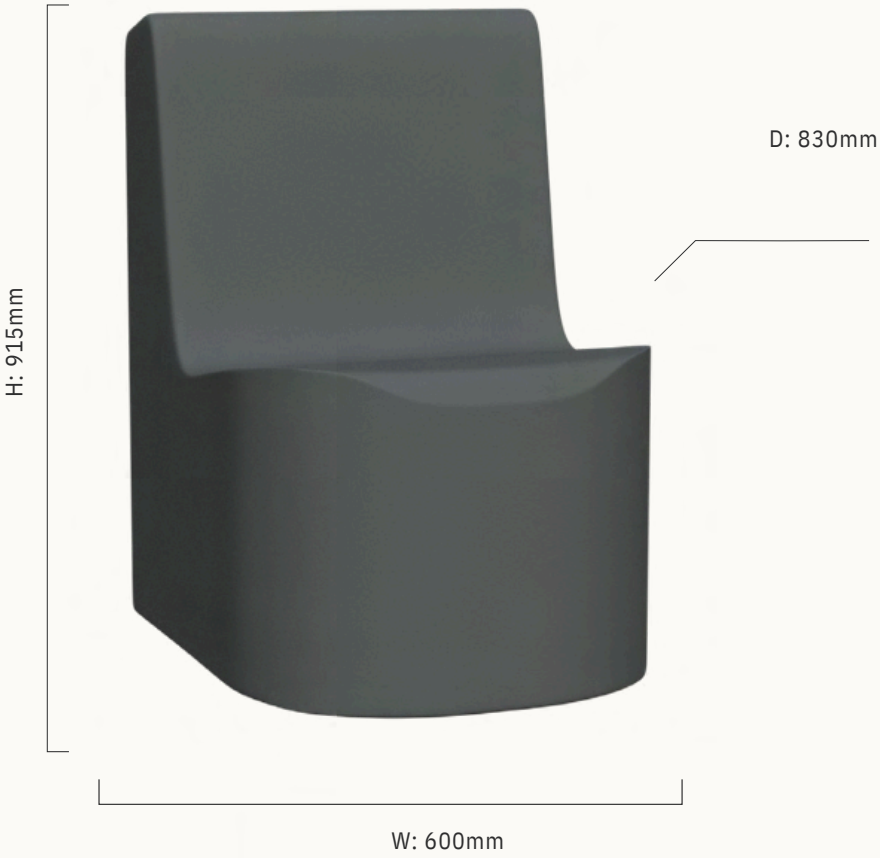

Arm chairs with a patterned fabric cushion designed for aged care and community care settings where a softer, more residential feel is the priority.

SEATING

Seating strong enough for the highest-risk rooms in the building, and considered enough that it never looks like it.

SINGLE CHAIR | AR1

Ergonomic Comfort: Designed with the perfect blend of foam and contour for extended sitting and optimal comfort. A flexible seating position allows for dynamic comfort without a fixed frame.

Durable LimberShield® Proprietary Finish: Strong, durable, and robust, engineered for lasting protection and comfort.

Anti-Ligature and Seamless: An extremely durable, easy-to-maintain surface with no seams. Rounded corners and a soft structure ensure a safe, comfortable, and non-institutional aesthetic.

Hygienic and Waterproof: An easy-to-clean, antibacterial finish for ultimate infection control.

User-Friendly: Unlike heavier models, our chair is movable, making it perfect for dining, everyday use, and modular setups.

Rigorously Strength Tested: Built to last, our chairs undergo extensive testing to ensure durability, safety, and long-lasting performance.

WING SINGLE CHAIR | AR2

Wing Back: Gently angled planes rise and curve forward at the shoulder, creating a subtle sense of enclosure without closing the chair in. The sculpted profile adds quiet structure while retaining Armadillo's signature rounded, seam-free form.

Ergonomic Comfort: The wing profile naturally supports the upper back and shoulders, encouraging a settled, upright posture suited to both therapeutic interaction and independent relaxation.

Durable LimberShield® Proprietary Finish: Strong, durable, and robust, engineered for lasting protection and comfort.

Anti-Ligature and Seamless: Durable, easy-to-maintain surface without seams. Rounded corners and a soft structure ensure safety, comfort, and non-institutional aesthetics.

Hygienic and Waterproof: Antibacterial finish for ultimate infection control and an easy-to-clean surface.

Easy to Reposition: Substantial mass engineered for safety, with a form that allows staff to reconfigure spaces quickly and confidently.

Rigorously Strength Tested: Thoroughly tested for durability and reliability, designed to withstand high-demand environments.

ACOUSTIC SINGLE CHAIR | AR4

COLOUR OPTIONS | Any colour at MOQ Refer to page 14

Acoustic Back: A moulded ribbed surface increases surface area to absorb and diffuse ambient noise, helping create a calmer, quieter environment in sensory rooms and high-stimulation spaces. Because the ribbing is formed from a single piece of solid foam, it delivers genuine acoustic benefit without introducing seams, fixings, or porous surfaces that could compromise hygiene or anti-ligature safety.

Sensory Environment Ready: Designed specifically to support calming and de-escalation in sensory rooms, the Acoustic Chair works as both functional furniture and an active contributor to a quieter, lower-stimulation environment.

Durable LimberShield® Proprietary Finish: Strong, durable, and robust, engineered for lasting protection and comfort.

Anti-Ligature and Seamless: Durable, easy-to-maintain surface without seams. The ribbed profile is fully integrated into the foam construction no attached panels, no fixings, no ligature risk.

Hygienic and Waterproof: Antibacterial finish for ultimate infection control. The ribbed surface cleans as easily as any other Armadillo product no additional maintenance required.

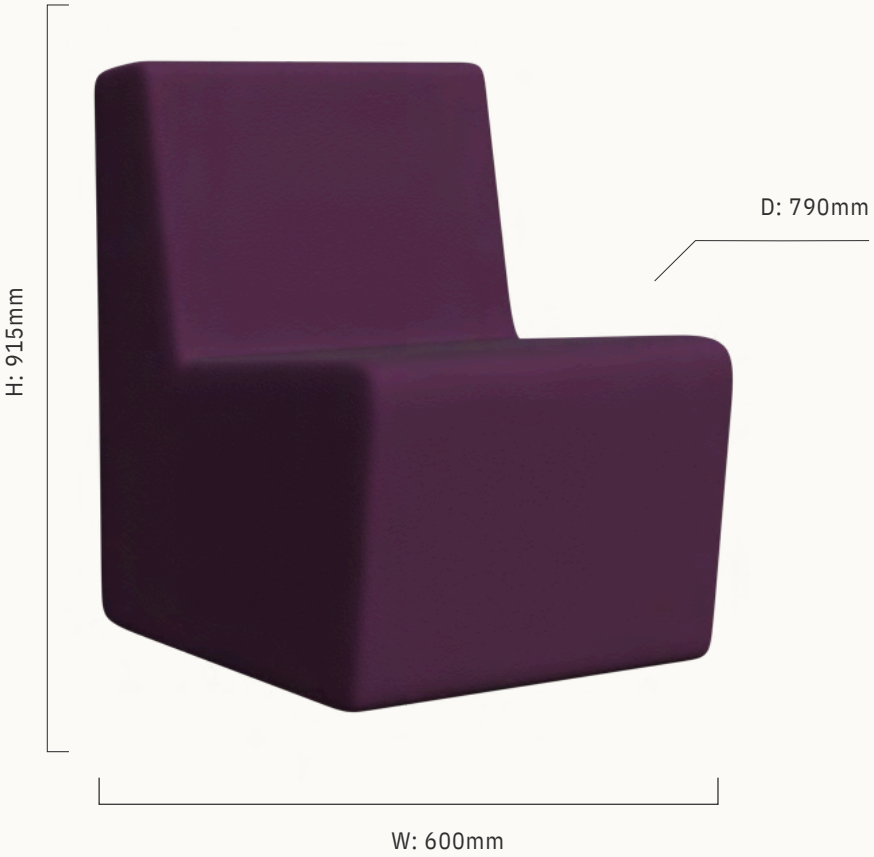

Easy to Reposition: Substantial mass engineered for safety, with a form that allows staff to reconfigure spaces quickly and confidently.

ORDER CODE: AR4 |**WEIGHT**: 16kg

3 SEATER RESTRAINT COUCH | AR20RC

COLOUR OPTIONS | Any colour at MOQ Refer to page 14

Purpose: Designed for De-Escalation

Removes points of harm, not points of dignity
Seam-free, frame-free construction leaves nothing on the piece to grab, break, or turn into a ligature point. Rounded edges and a soft overall silhouette are engineered to significantly reduce injury risk during moments of acute distress, without making the space feel confining.

Substantial by design, not by accident
Weight and stability are engineered into the piece so it holds its position through periods of heightened distress, supporting a settled environment that can help reduce agitation.

Built to feel like furniture, not equipment
Deliberately non-institutional in form. A space that still looks and feels like a couch helps preserve dignity in a person's most vulnerable moments and supports staff in de-escalating without the environment working against them.

Durable enough to disappear into the background
The LimberShield® proprietary finish is waterproof and antibacterial, built to withstand sustained, high-frequency use — so staff can focus on the person, not the furniture.

SINGLE ARMCHAIR | AR30

Ergonomic Comfort: Designed for individual seating with superior comfort and support. Flexible seating position provides dynamic comfort without a fixed frame.

Durable LimberShield® Proprietary Finish: Strong, durable, and robust, engineered for lasting protection and comfort.

Anti-Ligature and Seamless: Smooth, easy-to-maintain surface without seams. Rounded corners and soft structure ensure safety, comfort, and a non-institutional, welcoming appearance. No gaps between the seats and arms to prevent hiding contraband or bacteria buildup.

Hygienic and Waterproof: Antibacterial finish for ultimate infection control and a surface that is quick and easy to clean.

User-Friendly: Easy to reposition, making it ideal for a variety of spaces and environments, while ensuring complete safety.

Rigorously Strength Tested: Tested for durability and reliability to perform in high-demand settings, ensuring long-lasting use.

WING ARMCHAIR | AR32

Wing Back: Gently angled planes rise and curve forward at the shoulder, creating a subtle sense of enclosure without closing the chair in. The sculpted profile adds quiet structure while retaining Armadillo's signature rounded, seam-free form.

Ergonomic Comfort: The wing profile naturally supports the upper back and shoulders, encouraging a settled, upright posture suited to both therapeutic interaction and independent relaxation.

Integrated Foam Arms: Solid foam arms are moulded as part of the chair body, no fixings, no metal, no wooden components. Arms are positioned on the outside ends only, providing support and definition without introducing ligature risk.

Durable LimberShield® Proprietary Finish: Strong, durable, and robust, engineered for lasting protection and comfort.

Anti-Ligature and Seamless: Smooth, easy-to-maintain surface without seams. Rounded corners and soft structure ensure safety, comfort, and non-institutional aesthetics. No gaps between seats and arms to prevent concealment of contraband or bacteria buildup.

Hygienic and Waterproof: Antibacterial finish for ultimate infection control and an easy-to-clean surface.

Easy to Reposition: Substantial mass engineered for safety, with a form that allows staff to reconfigure spaces quickly and confidently.

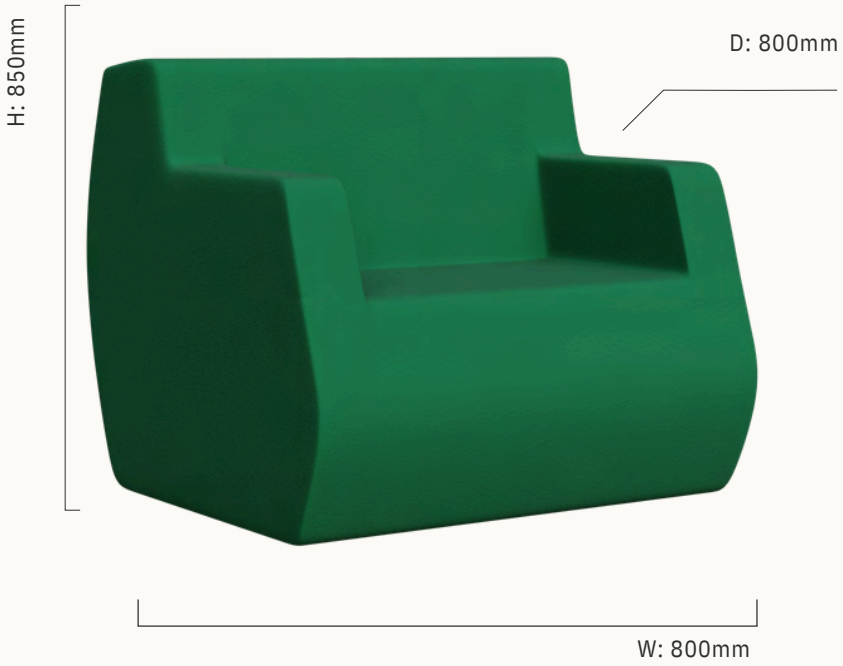

COLOUR OPTIONS | Any colour at MOQ | Refer to page 14

ORDER CODE: AR32 |**WEIGHT**: 19kg

©Abecca By Design Ltd 2025

ARC ARMCHAIR | AR33

Arc Back: A single, continuous curve flows unbroken from seat to headrest, softening the chair's visual presence and reducing the institutional feel of the space. No hard transitions, no pressure points.

Ergonomic Comfort: Designed to support a natural seated posture across extended periods. The curved back follows the body rather than working against it, promoting ease and calm in therapeutic environments.

Integrated Foam Arms: Solid foam arms are moulded as part of the chair body no fixings, no metal, no wooden components. Arms are positioned on the outside ends only, providing support and definition without introducing ligature risk.

Durable LimberShield® Proprietary Finish: Strong, durable, and robust, engineered for lasting protection and comfort.

Anti-Ligature and Seamless: Smooth, easy-to-maintain surface without seams. Rounded corners and soft structure ensure safety, comfort, and a non-institutional aesthetic. No gaps between seats and arms to prevent concealment of contraband or bacteria buildup.

ACOUSTIC ARMCHAIR | AR34

Acoustic Back: A moulded ribbed surface increases surface area to absorb and diffuse ambient noise, helping create a calmer, quieter environment in sensory rooms and high-stimulation spaces. Because the ribbing is formed from a single piece of solid foam, it delivers genuine acoustic benefit without seams, fixings, or porous surfaces that could compromise hygiene or anti-ligature safety.

Sensory Environment Ready: Designed to support calming and de-escalation in sensory rooms, the Acoustic Chair works as both functional furniture and an active contributor to a quieter, lower-stimulation environment.

Integrated Foam Arms: Solid foam arms are moulded as part of the chair body no fixings, no metal, no wooden components. Arms are positioned on the outside ends only, providing support and definition without introducing ligature risk.

Durable LimberShield® Proprietary Finish: Strong, durable, and robust, engineered for lasting protection and comfort.

Anti-Ligature and Seamless: Smooth, easy-to-maintain surface without seams. The ribbed profile is fully integrated into the foam construction, no attached panels, no fixings, no ligature risk. No gaps between seat and arms to prevent concealment of contraband or bacteria buildup.

Hygienic and Waterproof: Antibacterial finish for ultimate infection control. The ribbed surface cleans as easily as any other Armadillo product, no additional maintenance required.

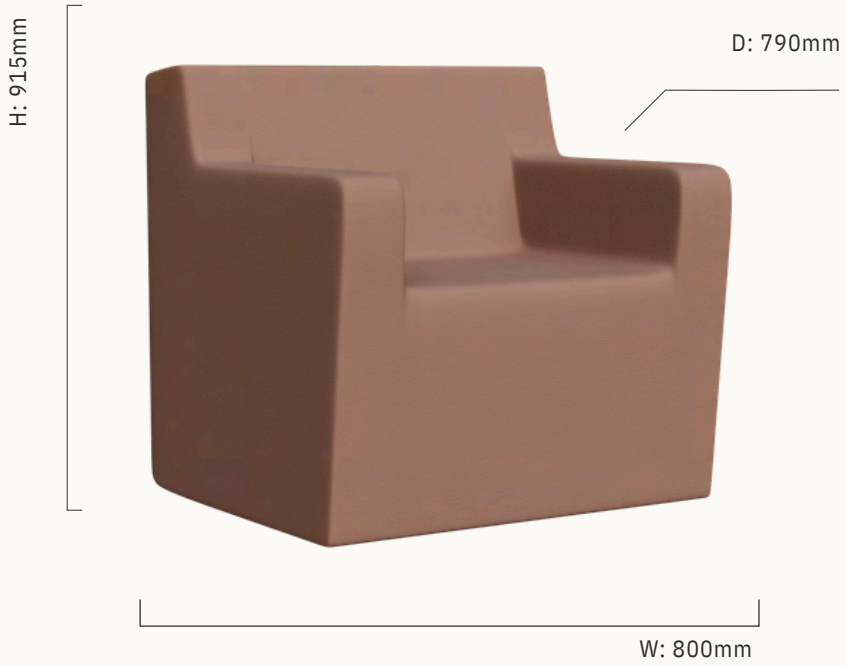

COLOUR OPTIONS | Any colour at MOQ | Refer to page 14

ORDER CODE: AR34 |**WEIGHT**: 19kg

©Abecca By Design Ltd 2025

CLASSIC ARMCHAIR | AR35

Classic Back: A clean, uninterrupted line rises from seat to headrest with no curves, angles, or surface detail. The straight back is the most minimal form in the Armadillo range, quietly purposeful, and at home in any environment.

Ergonomic Comfort: Designed to support a natural, upright seated posture across extended periods. The straight back profile provides consistent, even support without directing the body into a fixed position.

Integrated Foam Arms: Solid foam arms are moulded as part of the chair body no fixings, no metal, no wooden components. Arms are positioned on the outside ends only, providing support and definition without introducing ligature risk.

Durable LimberShield® Proprietary Finish: Strong, durable, and robust, engineered for lasting protection and comfort.

Anti-Ligature and Seamless: Smooth, easy-to-maintain surface without seams. Rounded corners and soft structure ensure safety, comfort, and non-institutional aesthetics. No gaps between seats and arms to prevent concealment of contraband or bacteria buildup.

Hygienic and Waterproof: Antibacterial finish for ultimate infection control and an easy-to-clean surface.

BARIATRIC SENSORY ROCKING CHAIR | ARB72

Generous proportions: Engineered for bariatric and oversized users, wider seat and deeper base. Designed for individual seating with superior comfort and support. Flexible seating position provides dynamic comfort without a fixed frame. The contoured base allows for easy entry and exit from the chair

Firm foam arms: Support safe entry and exit from the chair

Durable LimberShield® Finish: Strong, durable and robust, all packaged into the LimberShield® proprietary finish, offering long-lasting protection and comfort.

Anti-Ligature and Seamless: Smooth, easy-to-maintain surface without seams. Rounded corners and soft structure ensure safety, comfort, and a non-institutional, welcoming appearance. No gaps between the seat and arms, preventing spaces where contraband or bacteria could accumulate.

Hygienic and Waterproof: Antibacterial finish for ultimate infection control and a surface that's quick and easy to clean. Solid foam construction, no metal or wooden components that could cause harm

Easy to Reposition: Substantial mass, engineered to resist casual weaponisation. Suited to a variety of spaces and settings, can be repositioned as room layouts and needs change, without compromising on safety.

Rigorously Strength Tested: Tested for durability and reliability to perform in high-demand settings, ensuring long-lasting use.

MODULAR

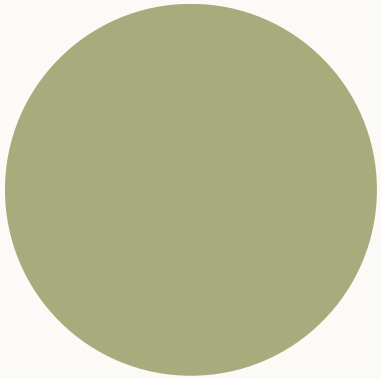

Configurable soft seating that adapts to the space, not the other way around.

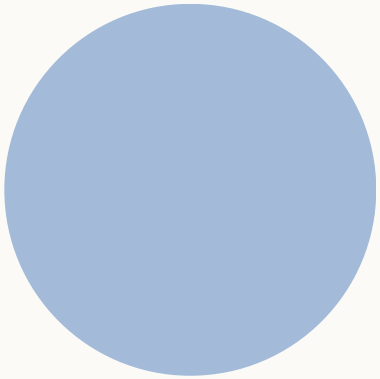

COLOUR RANGE - ARMADILLO® MODULAR

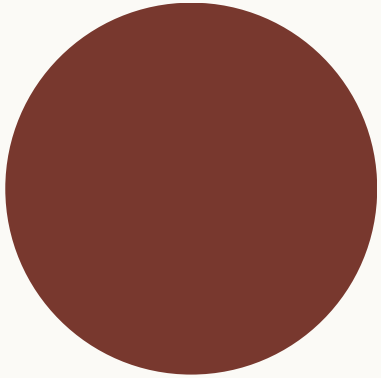

Warm Grey

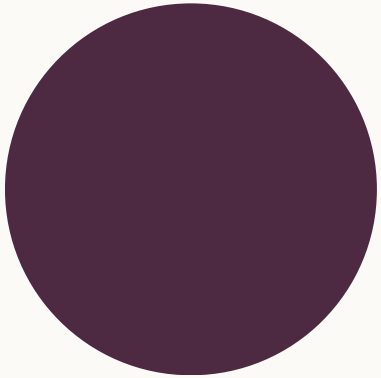

Pistachio Green

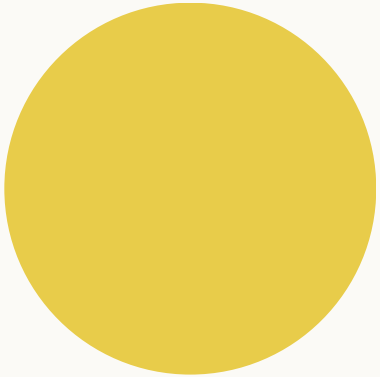

Baby Blue

Russet Brown

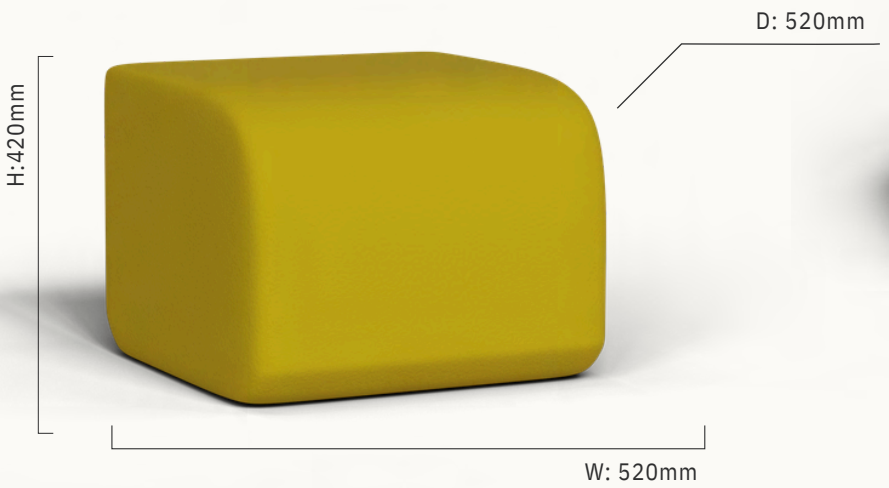

Royal Purple

Sunkist Yellow

MODULAR 1

| ARM1

Comfort & Configuration: Compact footprint built to combine easily with the rest of the range, so a room can grow from one piece to a full layout without needing a different product line.

ORDER CODE: ARM1 | **WEIGHT**: 6kg

The anchor piece. A low, compact unit sized to work as a single seat on its own or as the starting block for a larger layout, small enough to fit into corners and tight configurations without dominating the room.

Durable LimberShield® Finish: Strong, durable, and robust, all packaged into one proprietary finish process for long-lasting protection and comfort.

Anti-Ligature and Seamless: Smooth, easy-to-maintain surface without seams. Rounded corners and a soft structure support safety, comfort, and a non-institutional appearance.

Hygienic and Waterproof: Antibacterial finish for ultimate infection control, with a surface that's quick and easy to clean.

Rigorously Strength Tested: Thoroughly tested for durability and reliability, built to withstand high-demand environments.

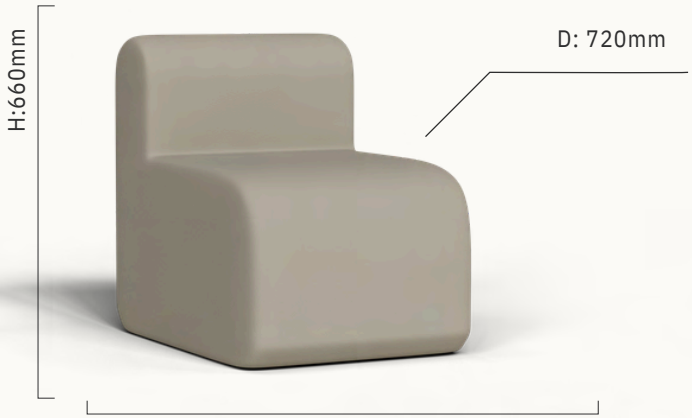

COLOUR OPTIONS | Any colour at MOQ | Refer to page 97

© Abecca By Design Ltd 2025

MODULAR 2

| ARM2

Comfort & Configuration: Full-hight back support gives this piece definition within a modular layout, offering a clear seating position even when surrounded by lower connecting elements.

COLOUR OPTIONS | Any colour at MOQ | Refer to page 97

The backed seat. At 660mm high, this is one of the taller pieces in the range, built to read as a proper seat with back support, rather than a low bench element, so it works well as the "sit here" anchor in a mixed layout of low and high pieces.

Durable LimberShield® Finish: Strong, durable, and robust, all packaged into one proprietary finish process for long-lasting protection and comfort.

Anti-Ligature and Seamless: Smooth, easy-to-maintain surface without seams. Rounded corners and a soft structure support safety, comfort, and a non-institutional appearance.

Hygienic and Waterproof: Antibacterial finish for ultimate infection control, with a surface that's quick and easy to clean.

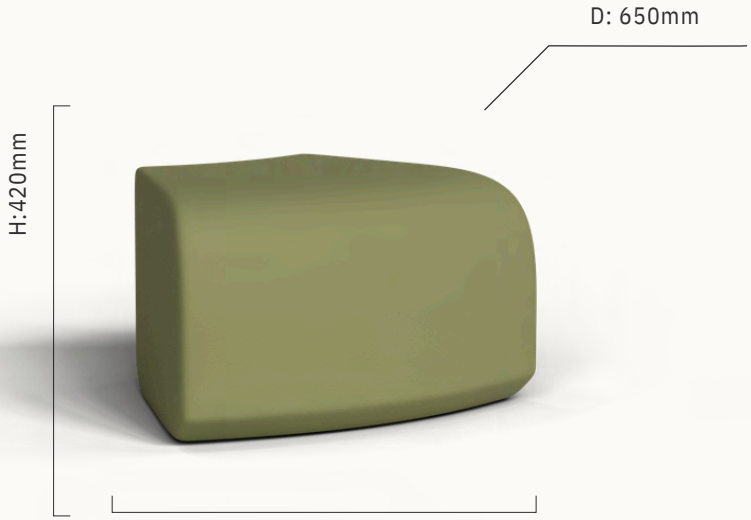

Rigorously Strength Tested: Thoroughly tested for durability and reliability, built to withstand high-demand environments

ORDER CODE: ARM2 | **WEIGHT**: 11kg

© Abecca By Design Ltd 2025

MODULAR 3

| ARM3

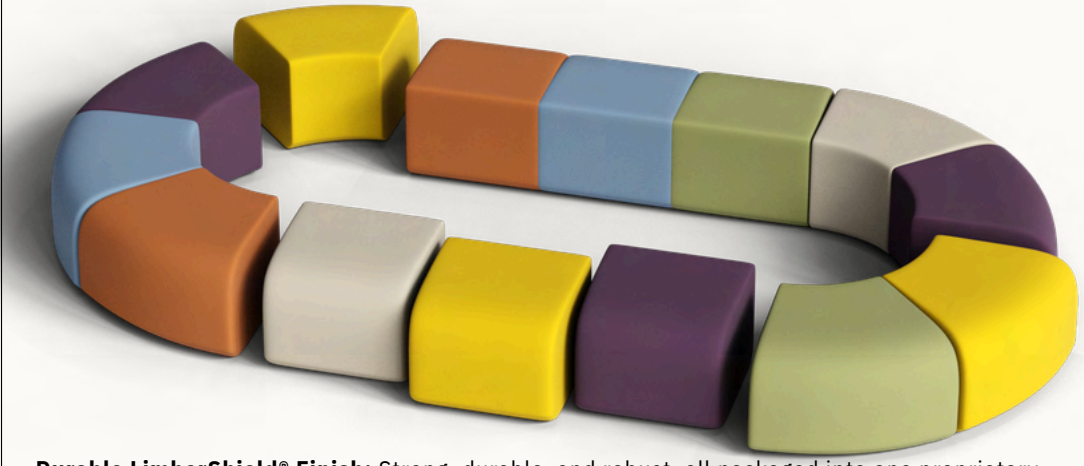

Comfort & Configuration: Sized to link with adjoining pieces, helping longer layouts read as one continuous form rather than a row of separate seats

ORDER CODE: ARM3 | **WEIGHT**: 8kg

The connector. A mid-sized, low-profile shape built to sit between taller pieces and bridge them into a continuous layout, rather than standing alone as a primary seat.

Durable LimberShield® Finish: Strong, durable, and robust, all packaged into one proprietary finish process for long-lasting protection and comfort.

Anti-Ligature and Seamless: Smooth, easy-to-maintain surface without seams. Rounded corners and a soft structure support safety, comfort, and a non-institutional appearance.

Hygienic and Waterproof: Antibacterial finish for ultimate infection control, with a surface that's quick and easy to clean.

Rigorously Strength Tested: Thoroughly tested for durability and reliability, built to withstand high-demand environments

COLOUR OPTIONS | Any colour at MOQ | Refer to page 97

© Abecca By Design Ltd 2025

MODULAR 4

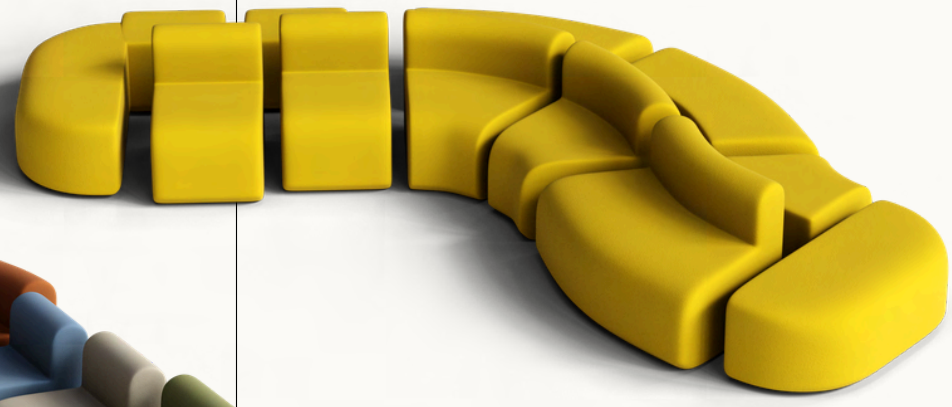

| ARM4

Comfort & Configuration: Generous proportions support extended sitting, making this the piece to build a configuration outward from rather than a connecting element.

The statement seat. The largest single-seat footprint in the range at 850 x 830mm, still built to the same 660mm back height as ARM2, sized to anchor a layout as the primary seating position group activities are built around.

Durable LimberShield® Finish: Strong, durable, and robust, all packaged into one proprietary finish process for long-lasting protection and comfort.

Anti-Ligature and Seamless: Smooth, easy-to-maintain surface without seams. Rounded corners and a soft structure support safety, comfort, and a non-institutional appearance.

Hygienic and Waterproof: Antibacterial finish for ultimate infection control, with a surface that's quick and easy to clean.

Rigorously Strength Tested: Thoroughly tested for durability and reliability, built to withstand high-demand environments

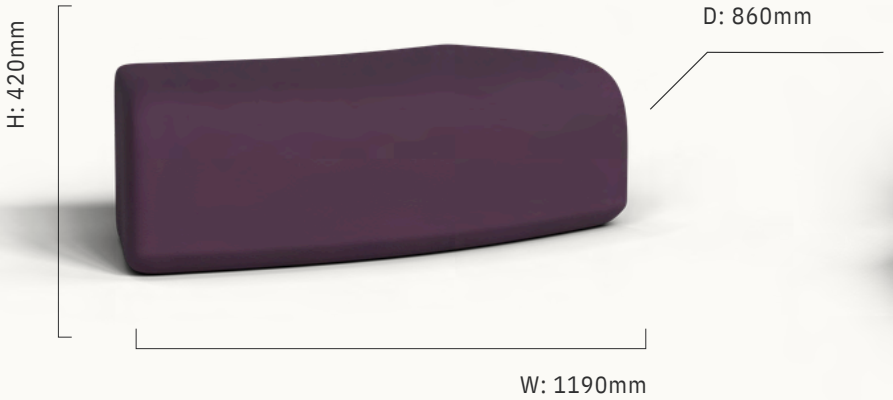

COLOUR OPTIONS | Any colour at MOQ | Refer to page 97

ORDER CODE: ARM4 | **WEIGHT**: 16kg

© Abecca By Design Ltd 2025

MODULAR 5

| ARM5

The low half of the wide-base trio. ARM5, ARM6, and ARM10 all share the same 860 x 1190mm footprint ARM6 is the taller, backed version at 600mm; ARM5 and ARM10 are the low, 420mm pair either side of it.

Comfort & Configuration: A low, wide base built to combine with ARM6's taller profile at the same footprint, or pair with ARM10 for a fully low-profile run.

ORDER CODE: ARM5 | **WEIGHT**: 16kg

Anti-Ligature and Seamless: Smooth, easy-to-maintain surface without seams. Rounded corners and a soft structure support safety, comfort, and a non-institutional appearance.

Hygienic and Waterproof: Antibacterial finish for ultimate infection control, with a surface that's quick and easy to clean.

Rigorously Strength Tested: Thoroughly tested for durability and reliability, built to withstand high-demand environments

COLOUR OPTIONS | Any colour at MOQ | Refer to page 97

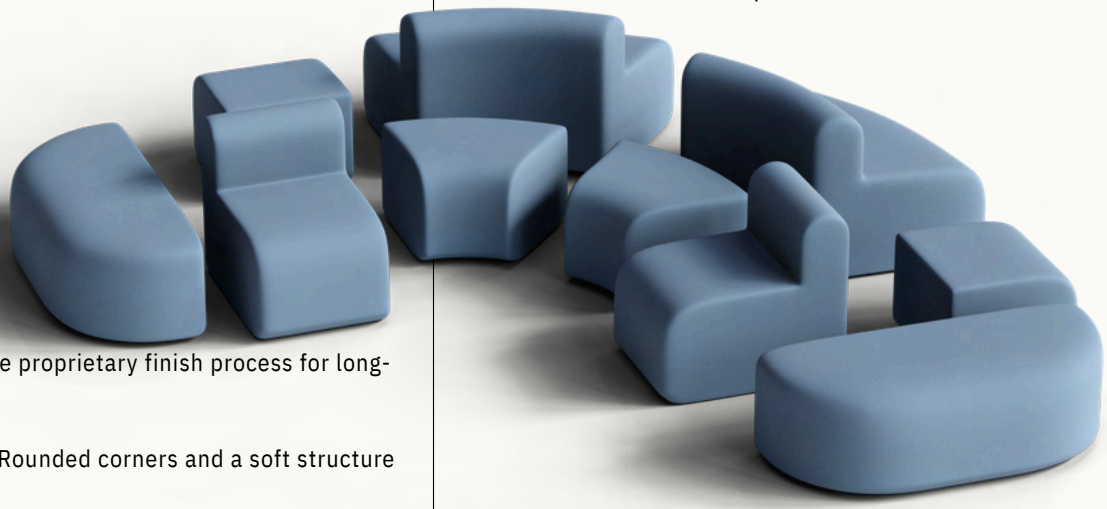

MODULAR 6

| ARM6

The tall anchor of the wide-base trio. Shares its footprint exactly with ARM5 and ARM10 (860 x 1190mm) but stands 600mm high, the backed sit-up seat option at that scale, versus the low, settle-in profile of the other two.

Durable LimberShield® Finish: Strong, durable, and robust, all packaged into one proprietary finish process for long-lasting protection and comfort.

Anti-Ligature and Seamless: Smooth, easy-to-maintain surface without seams. Rounded corners and a soft structure support safety, comfort, and a non-institutional appearance.

Hygienic and Waterproof: Antibacterial finish for ultimate infection control, with a surface that's quick and easy to clean.

Rigorously Strength Tested: Thoroughly tested for durability and reliability, built to withstand high-demand environments

Comfort & Configuration: The perfect blend of foam and contour for extended sitting and optimal comfort, built to anchor a layout that also includes ARM5 and/or ARM10 at the same footprint.

COLOUR OPTIONS | Any colour at MOQ | Refer to page 97

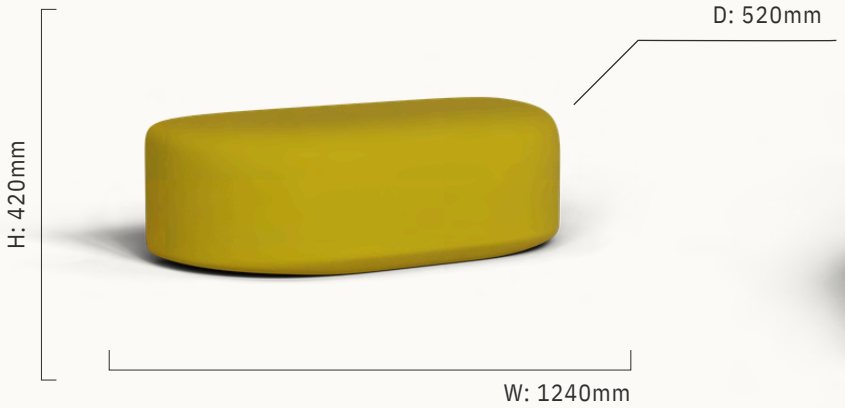

ORDER CODE: ARM6 | **WEIGHT**: 23kg

© Abecca By Design Ltd 2025

MODULAR 7

| ARM7

The long bench. The widest, lowest piece in the range at 1240mm, built to run along a wall or bridge a longer stretch of a layout as a continuous low seat rather than a single occupant position.

Durable LimberShield® Finish: Strong, durable, and robust, all packaged into one proprietary finish process for long-lasting protection and comfort.

Anti-Ligature and Seamless: Smooth, easy-to-maintain surface without seams. Rounded corners and a soft structure support safety, comfort, and a non-institutional appearance.

Hygienic and Waterproof: Antibacterial finish for ultimate infection control, with a surface that's quick and easy to clean.

Rigorously Strength Tested: Thoroughly tested for durability and reliability, built to withstand high-demand environments

Comfort & Configuration: Smooth, easy-to-maintain surface without seams. Rounded corners and soft structure support safety and comfort along its full length.

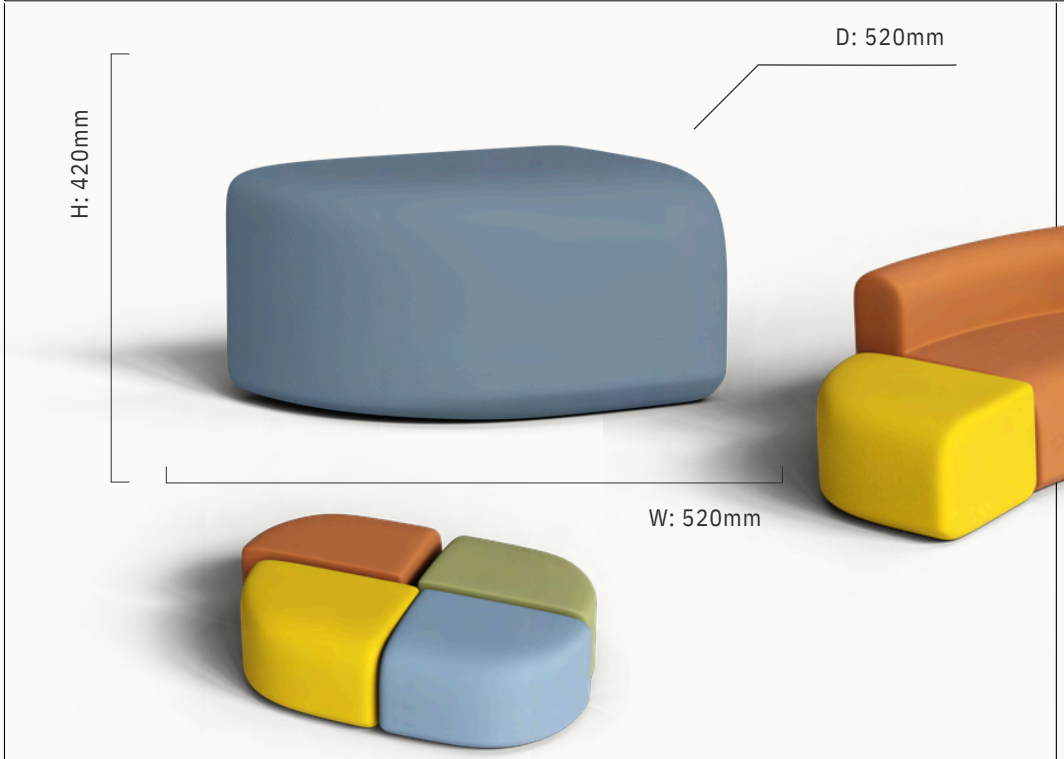

COLOUR OPTIONS | Any colour at MOQ | Refer to page 97

ORDER CODE: AR7 | **WEIGHT**: 13kg

© Abecca By Design Ltd 2025

MODULAR 8 | ARM8

Comfort & Configuration: A modular system that bends around any space, built to combine with ARM1 for two low-profile options at one footprint.

COLOUR OPTIONS | Any colour at MOQ | Refer to page 97

The anchor piece, companion shape. Shares its footprint exactly with ARM1, sized to pair or alternate with it in a layout, giving two shape options at the same scale rather than one fixed block.

Durable LimberShield® Finish: Strong, durable, and robust, all packaged into one proprietary finish process for long-lasting protection and comfort.

Anti-Ligature and Seamless: Smooth, easy-to-maintain surface without seams. Rounded corners and a soft structure support safety, comfort, and a non-institutional appearance.

Hygienic and Waterproof: Antibacterial finish for ultimate infection control, with a surface that's quick and easy to clean.

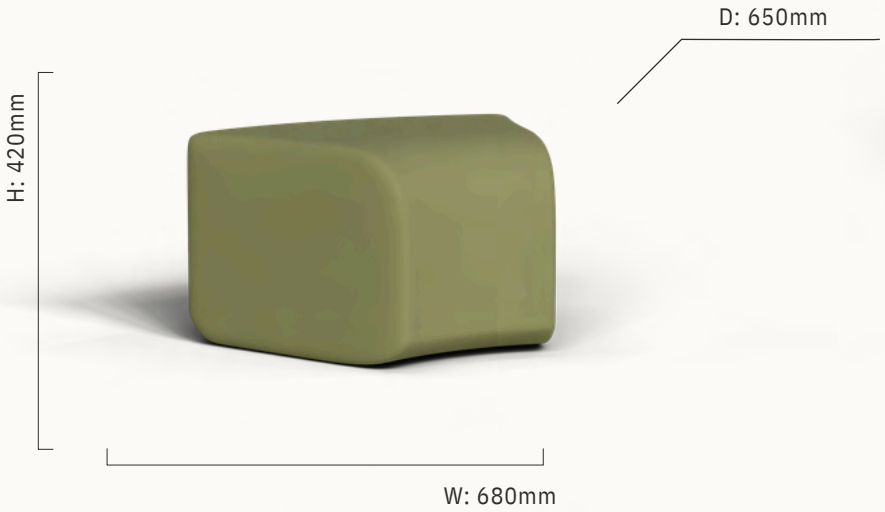

Rigorously Strength Tested: Thoroughly tested for durability and reliability, built to withstand high-demand environments

ORDER CODE: ARM8 | **WEIGHT**: 6kg

© Abecca By Design Ltd 2025

MODULAR 9

| ARM9

Comfort & Configuration: Sized to link with adjoining pieces at the same scale as ARM3, giving a second shape option for continuous layouts.

ORDER CODE: ARM9 | **WEIGHT**: 8kg

The connector, companion shape. Shares its footprint exactly with ARM3, the same "bridge between taller pieces" role, offered as a second shape option at the same scale.

Durable LimberShield® Finish: Strong, durable, and robust, all packaged into one proprietary finish process for long-lasting protection and comfort.

Anti-Ligature and Seamless: Smooth, easy-to-maintain surface without seams. Rounded corners and a soft structure support safety, comfort, and a non-institutional appearance.

Hygienic and Waterproof: Antibacterial finish for ultimate infection control, with a surface that's quick and easy to clean.

Rigorously Strength Tested: Thoroughly tested for durability and reliability, built to withstand high-demand environments

COLOUR OPTIONS | Any colour at MOQ | Refer to page 97

© Abecca By Design Ltd 2025

MODULAR 10

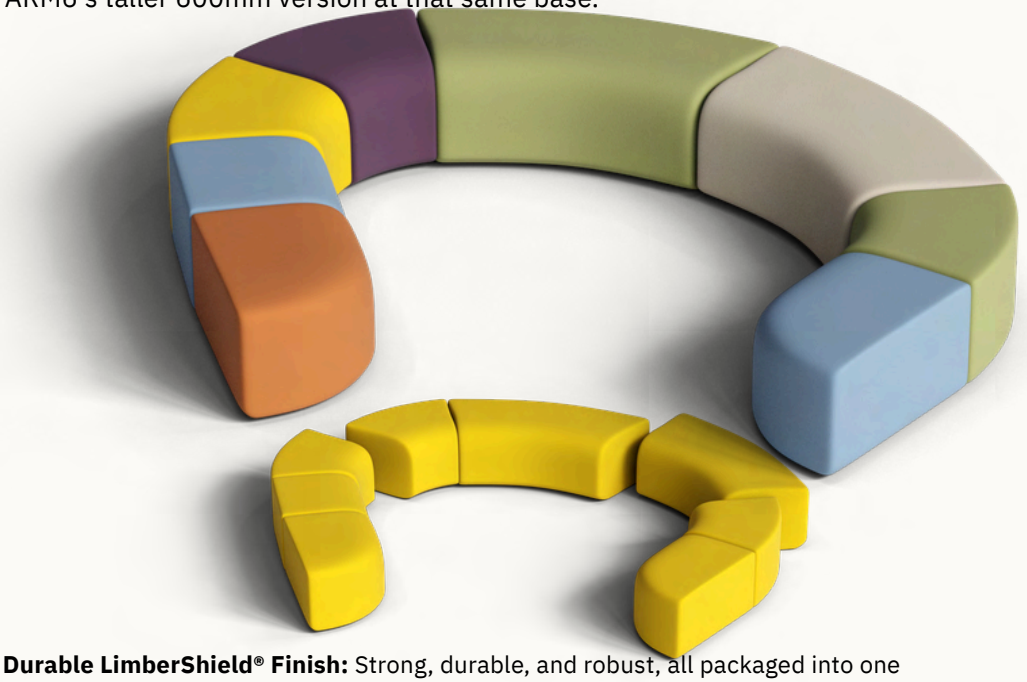

| ARM10

Comfort & Configuration: A range of simple, flexible soft seating in specific shapes and sizes that can be reconfigured quickly, combining durability with adaptability to create highly functional environments.

COLOUR OPTIONS | Any colour at MOQ | Refer to page 97

The low half of the wide-base trio, companion to ARM5. Same footprint and height as ARM5 (860 x 1190 x 420mm), and the low-profile counterpart to ARM6's taller 600mm version at that same base.

Durable LimberShield® Finish: Strong, durable, and robust, all packaged into one proprietary finish process for long-lasting protection and comfort.

Anti-Ligature and Seamless: Smooth, easy-to-maintain surface without seams. Rounded corners and a soft structure support safety, comfort, and a non-institutional appearance.

Hygienic and Waterproof: Antibacterial finish for ultimate infection control, with a surface that's quick and easy to clean.

Rigorously Strength Tested: Thoroughly tested for durability and reliability, built to withstand high-demand environments

CUSHIONS

The difference between a room that's safe and a room that feels like home.

The Purpose of Cushions

Aesthetic Warmth for Aged Care Environments

A well-built chair solves safety, durability, and support. But the rooms our aged care furniture lives in also need to feel like somewhere a person actually wants to sit, somewhere that feels like home rather than a facility. That's what cushions are for.

Cushions in this range are a purely aesthetic layer. They don't change how the chair performs, and they're not a substitute for the seat itself. What they do is soften the visual language of the room, introduce colour, pattern and texture, and give a space the kind of personality that a single upholstered form can't offer on its own.

Because it's a styling choice rather than a functional one, it can be led entirely by the room. Cushions can be selected to sit quietly alongside an existing colour scheme, echo a facility's wider interior palette, or simply bring in a warmer, more residential feel where a space has started to feel clinical.

What Cushions Bring To A Space

- Softens the visual language of clinical furniture
- Introduces colour, pattern and texture
- Helps a room feel personalised, not institutional
- An easy, low-cost way to refresh a room's feel over time

Pairing Cushions With Your Space

The right cushion choice starts with the room, not the catalogue. If you can share photos of the space, existing furnishings, or a colour palette you're working to, our team can help select tones and fabrics that sit naturally alongside what's already there rather than competing with it.

A Note On Function

Cushions in this section are presented separately from the technical specifications of the chairs they accompany. For fire rating, stain resistance, and cleaning information, refer to the relevant Cushion Fabric pages that follow.

Aesthetic and styling guidance only. See Cushion Fabric pages for technical performance information

ARM CHAIR CUSHION | AR30C

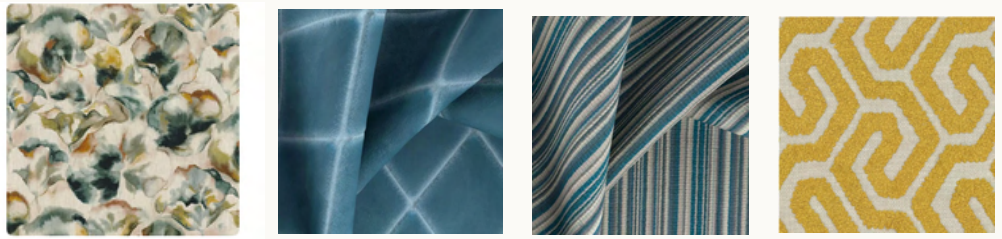

Safe, Soft & Durable Design: Foam-only structure with no sharp edges or hard components supports safety and everyday durability. Easy to clean with an antibacterial surface, finished with our LimberShield® proprietary finish for lasting protection and comfort in daily use.

Structured Comfort, Softened by Cushions: The Arm Chair's defined arms and upright profile give a sense of structure and support, while the coordinating cushion introduces colour and softness that ties the piece to the room around it. A single chair with real presence, without feeling clinical.

Non-Institutional & Hygienic: Designed to blend into any environment with a warm, inviting look. The easy-to-maintain surface supports hygiene and infection control without compromising on comfort.

Perfectly Paired with Abecca Furniture: Complements Abecca's tables, ottomans, and other single seating for a cohesive, considered setup.

Cushion Fabrics: Fabrics shown were available at time of printing. As our fabric range changes regularly, contact us for our current fabric catalogue. See the Cushion Fabric Guide for fire and stain performance information.

Fire & Stain Resistant Fabrics

Dual-Protection Cushion Range

Where a space carries both fire compliance obligations and a high likelihood of soiling or staining, this range brings the two requirements together in a single fabric. It is the default recommendation for environments where furniture is used around the clock, cleaned frequently, and must continue to perform under both conditions without one compromising the other.

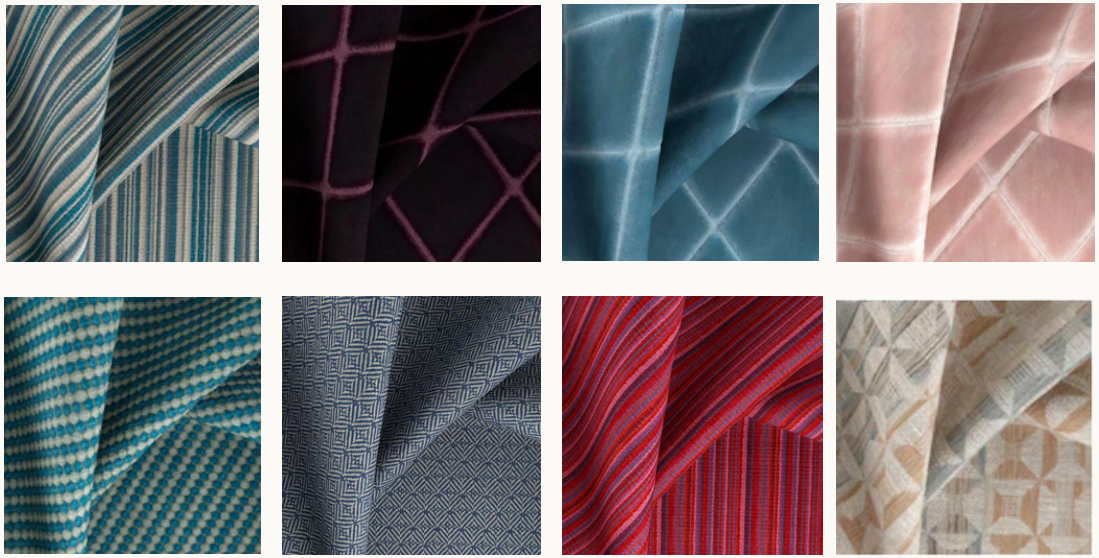

Every fabric in this group is tested to the same standards applied across the Armadillo range, giving specifiers one point of reference rather than a trade-off between fire performance and cleanability.

The lead fabrics in this range are Linea, Tessuto, and Marlo, our established Eagle fabrics, which combine fire retardancy, stain resistance, antibacterial performance, and water resistance in one fabric. Zepel FibreGuard Pro FR fabrics sit alongside them, carrying the same fire retardant and antimicrobial treatment with a broader colour palette to draw from.

Recommended For

Aged care resident rooms
Aged care lounges and common areas
Lounges and reception areas
Lower-risk community settings
Spaces prioritising a residential feel

FABRIC OPTIONS

Fire, stain, and antibacterial performance are tested and certified to the relevant standard for each fabric's country of origin. Our Eagle fabrics: Linea, Tessuto, and Marlo, are tested to New Zealand and Australian standards. Zepel FibreGuard Pro FR fabrics are tested to their European equivalents. Both meet the fire and stain performance this range is built around.

Contact us for the specific certification and rating that applies to your chosen fabric.

Stain Resistant Fabrics

Aesthetic & Everyday-Wear Cushion Range

Not every space carries the fire-testing obligations of a secure clinical or corrections environment. Where the priority is everyday spills, general wear, and ease of cleaning rather than ligature or ignition risk, this range offers a broader palette and softer hand-feel without asking facilities to pay for compliance they don't need.

This is the natural fit for the Armadillo Comfort Collection and other lifestyle-led aged care settings, where the room needs to feel residential first and clinical second.

The range is built around Zepel FibreGuard Pro, a moisture barrier fabric technology with an antimicrobial finish applied during production. The finish helps resist mildew and odour from accidental spills, and limits the ability of liquids and bacteria to take hold in the yarn or upholstery foam beneath. Unlike some moisture barrier fabrics, FibreGuard Pro stays soft and flexible rather than rigid, so it suits residential-feeling spaces as well as high-traffic ones. This is the standard, non-fire-retardant Zepel fabric; the fire retardant version sits on the Fire & Stain Resistant page

Recommended For

Aged care resident rooms
Aged care lounges and common areas
Lounges and reception areas
Lower-risk community settings
Spaces prioritising a residential feel

FABRIC OPTIONS

This range is built around Zepel FibreGuard Pro, tested and certified to its country of origin's standard for stain resistance and antimicrobial performance. Composition and cleaning method are consistent across the range; individual colourways may vary in availability.

Contact us for the specific certification that applies to your chosen fabric.

Abecca By Design Ltd 2025

Fire Resistant Fabrics

Compliance-Led Cushion Range

Some tenders and building classifications call for fire-tested upholstery even where stain resistance is not the leading concern, for example architectural, hospitality-adjacent, or waiting-area applications specified against a fire code rather than a clinical risk profile. This range meets that requirement while giving specifiers a wider aesthetic range than the dual-protection fabrics.

Where a facility is unsure which standard applies, we'd recommend starting the conversation with fire compliance rather than fabric choice.

Recommended For

Waiting and reception areas
Architect and property-planner specified spaces
Settings governed by building fire code
Lower soiling risk, fire-code-led briefs

FABRIC OPTIONS

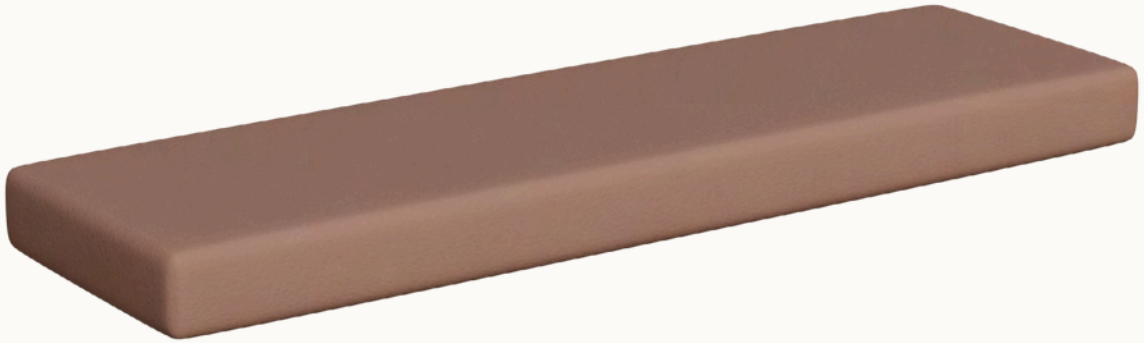

Fire performance is tested and certified to the relevant standard for each fabric's country of origin. As this range prioritises aesthetic variety over dual protection, stain resistance, composition, and cleaning method vary by fabric.

Contact us for the specific certification that applies to your chosen fabric, or see the Cushion Fabric Guide for full technical data.

WHAT OUR CUSTOMERS SAY:

We are very pleased with our new furniture that has been delivered to Unit 2. It looks fantastic and makes our unit feel so much brighter and homely!

THERESA | MONASH HEALTH AU

We are so delighted to finally have lovely pieces for our clients and staff to utilise. The beauty is they are not only pleasing on the eye with the vibrant colours, but the practicality of the furniture in this high acuity area is second to none. Simply wonderful.

DONNA BRYCE | CNM MENTAL HEALTH,
SOUTH CANTERBURY DHB

I really appreciated the effort that your team put in for this application. The client is very satisfied with their bed and they have recommended the equipment to lots of other people.

MARIA

Some positive feedback about your products that we have purchased, the team here are really happy with your product and the young people we service also gave positive feedback in relation to comfort and practicability.
Keep up the good work.

JASON COYLE | ORANA YOUTH JUSTICE NSW

CLEANING INSTRUCTIONS

01

01. WIPE DOWN REGULARLY

Wipe down all surfaces with a lint-free cloth dampened with an approved disinfectant. Pay attention to the rear panel and base: areas that may be overlooked in routine cleans.

02

02. NO RINSE REQUIRED

No rinsing is required: the LimberShield® finish is fully resistant to disinfectant residue. Allow to air dry or dry with a clean cloth before returning to use.

03

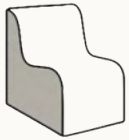

03. USE APPROVED PRODUCTS ONLY

Only use products confirmed compatible with the LimberShield® proprietary finish. Deep or abrasive scrubbing isn't necessary: a firm wipe is sufficient.

Download the full Cleaning Guide → www.abeccadesign.com/care-guide/

04

04. AFTER USING ANY PRODUCTS

Allow to air dry or dry with a clean cloth before returning to use
Deep abrasive scrubbing is unnecessary and not recommended: a firm wipe is sufficient.

USING A DIFFERENT PRODUCT?

If you would like to use a different cleaning product, please contact Abecca® at customerservice@abeccadesign.com before use to confirm compatibility with LimberShield® proprietary finish.

WARRANTY NOTICE

Failure to follow these instructions may void the warranty. Abecca strongly recommends keeping a weekly cleaning log recording the date, products used, and the person who completed the clean: in the event of a warranty claim, this log along with the products used will be requested as part of the assessment process. To get your cleaning methods and products approved, please contact Abecca: customerservice@abeccadesign.com
